## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, Claim(s) 1-5, 16-19, part of Claim 20 and 21-36, drawn to a microfluidic device and a method of preparing the same.

Group II, Claim(s) 6-15 and part of Claim 20, drawn to a method of bonding a first substrate to a second substrate.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I is directed to a microfluidic device that is defined as an apparatus or component of an apparatus that includes at least one **microchannel** (referring to

Applicants' specification, page 8, lines 15-16) utilizing a polymer derived from a specific methacryl-containing POSS monomer. However, Group II is merely directed to a method of bonding substrates where the aforementioned special feature of **micrichannel(s)** is **not** necessarily present.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
